

ORDINANCE No. 52.

An ordinance to provide for the levy of taxes for the year A. D. 1906, for Municipal purposes for the City of Live Oak, Florida, and to provide a sinking fund and for the annual interests on the \$10,000.00 bonded indebtedness of said City.

Be it ordained by the Mayor and the City Council of the City of Live Oak, Florida:

Section 1. For the purpose of securing an equal and uniform rate of taxation and to pay the current expenses of the City of Live Oak, Florida, for the ensuing tax year, there shall be levied and collected upon and out of the real and personal property within the corporate limits of the City of Live Oak, Florida, for the year A. D. 1906, the tax of 7 mills on the dollar.

Sec. 2. For providing a sinking fund and paying the annual interest on the \$10,000.00 bonded indebtedness of the City of Live Oak, Florida, dated February 28th, 1906, there shall be levied and collected upon and out of the real and personal property within the corporate limits of the City of Live Oak, Florida for the year A. D. 1906, a tax of 1-3 of one mill on the dollar.

Sec. 3. This ordinance shall go into effect immediately upon its passage by the Council and approved by the Mayor.

Introduced by J. L. White, member of the City Council and passed by the City Council this 17th day of September, A. D., 1906.

Attest:

CHAS. H. BROWN,
Pres. of City Council.

S. P. MAYS, City Clerk.

I, S. P. Mays, City Clerk of the City of Live Oak, Florida, do hereby certify that the above and foregoing ordinance was duly and regularly passed by the City Council of the City of Live Oak, Florida, on the 17th day of September, A. D. 1906, and the same is hereby certified to the Mayor for his approval.

Witness my hand and the seal of said City this 17th day of September, A. D. 1906.

(Seal)

S. P. MAYS, City Clerk.

Examined and approved by me this September 17th, 1906.

M. E. BROOME, Mayor.

Moon Bent.

Many people suppose that moonlight possesses great potency and has a wonderful influence on or over animate and inanimate things on our planet. Such persons should remember that moonlight is only reflected sunlight and that the quality and quantity of the light thus reflected are not what is generally imagined. In fact, it is a truth which has often been demonstrated by the speculative astronomer that it would take 618,000 full moons to afford an amount of light equal to that emitted by the sun, and, furthermore, there is only sky space for 75,000 such disks. Some heat comes from moonlight. However, it is in quantities so small that it cannot be measured by ordinary instruments. Flammarion says that the amount of heat emitted by a full moon while at its zenith cannot be more than one eighty-thousandth of the amount that the sun supplies when standing on the meridian on a favorable day in July. Such being the case, it is really surprising that intelligent people should consider that the moon has such a wonderful "influence" over terrestrial affairs.

Inns In Hungary.

Wayside inns in Hungary generally rejoice in very quaint titles. This one was called the Dropperin and had the usual sign outside—viz, a long pole with a wooden ring and a gigantic wine bottle suspended from it. The system of keeping the scores is primitive, but practical. The regular customers and the innkeeper each have a bit of wood called rovas, with the name of the person written on it, and every liter of wine consumed is marked by each making a notch on his respective bit of wood. When the score is paid off, both the rovas are burned. Consequently you hear the peasants inviting each other to ingyonroviasmor, literally drink on my "knotch stick," which sounds most comical—"Wanderings In Hungary."

Cruel.

A cashier in the financial district of New York, on being advised by his physician to take a vacation not long ago, wrote the agent of a South American steamship line as follows: "As I am thinking of taking a trip to South America, please advise me immediately with particulars relative to rates, accommodations, and so on, to and from the various ports usually visited by tourists at this season of the year." The answer came by special delivery, marked private and confidential, "One of our steamers will sail for Valparaiso next Wednesday; shortest and quickest way out of the country."

A Test For Seasickness.

Many people have a genuine curiosity to know if they would be sea sick in case they should take an ocean voyage. An easy way to put the matter to a test is to stand before the ordinary mirror that turns in its frame and let some one move it slowly and slightly at first, gradually growing faster, while you look fixedly at your own reflection. If you feel no effect whatever from it the chances are that you can stand an ordinary sea voyage without any qualm.

Her Wisdom.

"Girls!" quietly called old but eminently astute Aunt Broadhead. "Ma'am?" they replied as they fluttered obediently to her. "Always remember, girls, that when a man professes to have a 'fatherly interest' in you his own daughters need it, that your own father can sufficiently supply you with it and that is the oldest of all stories save one in the world."—Puck.

An Experiment.

"Where are you going, Michael, so early?"
"Apothecary's; wife got sick last night."
"Doctor been there yet?"
"No. I found a prescription in the street when I was in town, and I'm going to have that made up and try it."
—Fliegende Blatter.

Conflicting.

Actor—I can't play all three of the parts you have assigned to me in this melodrama. Manager—Why not? Actor—Because in the first act two of them engage in a fight, and the third rushes in and separates them.

Fine feelings without vigor or reason are in the situation of the extreme feather of a peacock's tail, dragging in the mud.—Foster.
